

Digitalized Health-Care Solutions

T.E. mini-project report

By

Chouhan Divya Jaisingh - EU1184007 (11)

Dodamani Ankita Mallikarjun - EU1184012 (19)

Shah Ashok Jivlal - EU2184011 (65)

Under the guidance of Ms.
Shraddha More

Department of Information Technology
St. John College of Engineering and Management
University of Mumbai
2020-2021

CERTIFICATE

This is to certify that the project entitled **“Digitalized Health-Care Solutions”** is a Project report of

“Chouhan Divya Jaisingh” – EU1184007 (11)

“Dodamani Ankita Mallikarjun” - EU1184012 (19)

“Shah Ashok Jivlal” - EU2184011 (65)

Submitted during the academic year 2020-2021.

Subject In-charge _____

(Ms. Shraddha More)

Head of Department _____

(Mrs. Anita Chaudhari)

External Examiner _____

DECLARATION

We declare that this written submission represents our ideas in our own words and others ideas or words have not been included, we have adequately cited and referenced the original sources. We also declare that we have adhered to all principles of academic honesty and integrity and have not misrepresented or fabricated or falsified any idea/data/fact/source in our submission. We understand that any violation of the above will be cause for disciplinary action by the Institute and can also evoke penal action from the sources which have thus not been properly cited or from whom proper permission has not been taken when needed.

Divya Chouhan _____

Ankita Dodamani _____

Ashok Shah _____

ACKNOWLEDGEMENT

Today, we cannot find appropriate words that will express deep sense of gratitude and satisfaction.

We are indebted to our inspiring Ms. Shraddha More (Subject In-charge) who has extended all valuable guidance, along with Mrs. Anita Chaudhari (HOD IT Dept.) in helping and giving constant encouragement through various difficult stages for development of the project.

We express our sincere gratitude to our respected principal Dr. G. V. Mulgund for encouragement and facilities provided to us.

We would also like to acknowledge the patience that our ever beloved parents have shown during our efforts and the encouragement we have received from them.

Thus we have fully obliged and convey our thanks to the teaching and as well as non-teaching staff of the department. Special thanks to all the lab assistants for helping us with problems developed in the lab and assisting, helping us to solve any problems generated on the spot. Last but not the least we would like to thank all direct and indirect identities of the college with whom we took the strides for this successful project.

ABSTRACT

The user first visits the home page where they can see the facilities one can avail. If the user is facing any medical issues they can follow a set of steps to get to a proper guidance and supervision. The user can book appointment with any doctor as suitable using the consultation page . We have a doctor and patient registration page wherein one can get the credentials to log into their personal track of medical history. Similarly, a doctor can also register themselves and get credentials to monitor the patient they are supervising . we have a contact us page wherein any user can connect with us and to get guidance and give feedback. We have an about us page where one can get to know us and our organization.

1.INTRODUCTION

1.1 Overview

Digital health solutions such as mobile apps, patient portals and care team dashboards are proliferating rapidly. ... Ideally, digital health solutions improve patient care, make clinical teams more efficient and reduce costs. The digitization of health care has given birth to numerous tools and resources that improve healthcare services, including software that makes health information more accessible to patients, and keeps patient data secure in one place. The use and scale up of digital health solutions can revolutionize how people worldwide achieve higher standards of health, and access services to promote and protect their health and well-being..

1.2 Problem Statement

Since Hospital is associated with the lives of common people and their day-to-day routines so we Decided to work on this project. The manual handling of the record is time consuming and highly prone to error. The purpose of this project is to automate or make online, the process of day-to-day activities like Room activities, Admission of New Patient, Discharge of Patient, Assign a Doctor, Centralizing the History of Patients Health etc. We have tried our best to make the complicated process Hospital Management System as simple as possible using Structured & Modular technique & Menu oriented interface. We have tried to design the Website in such a way that user may not have any difficulty in using this package & further expansion is possible without much effort. Even though we cannot claim that this work to be entirely exhaustive, The website to be fully functional and complete the main purpose of our exercise is perform each Hospital's activity in computerized way rather than manually which is difficult for a person to maintain logs and is time consuming and more prone to error. This project is a small step to lessen those problems.

1.3 Technologies Used

1.3.1 HTML 5

- HTML stands for Hyper Text Mark-up Language and is the standard mark-up language for creating Web pages.
- HTML describes the structure of Web pages using mark-up.
- HTML elements are the building blocks of HTML pages.
- HTML elements are represented by tags.
- HTML tags label pieces of content such as "heading", "paragraph", "table", and so on.
- Browsers do not display the HTML tags but use them to render the content of the page.

1.3.2 Cascading Style Sheets

- CSS is a language that describes style of HTML document.
- It describes how HTML elements should be displayed. It can control the layout of multiple web pages all at once.
- Cascading style sheets can be classified into three sub components i.e. External CSS, Internal CSS and Inline CSS.

1.3.3 PHP

- PHP is a server scripting language and power tool that is used to make dynamic and responsive web pages.
- PHP is widely used, free and efficient alternative to competitors such as Microsoft ASP.
- PHP scripts are executed on the server.

1.3.4 SQL

- SQL stands for Structured Query Language. It is a standard language for storing, manipulating and retrieving data in a database.
- A database most often contains one or more tables. Each table is identified by a name. Tables contain records (rows).
- The Select statement is used to select data from a database. The data returned is stored in a result table called as the result-set.
- The insert statement is used to enter values into your database.

2. SYSTEM DESIGN

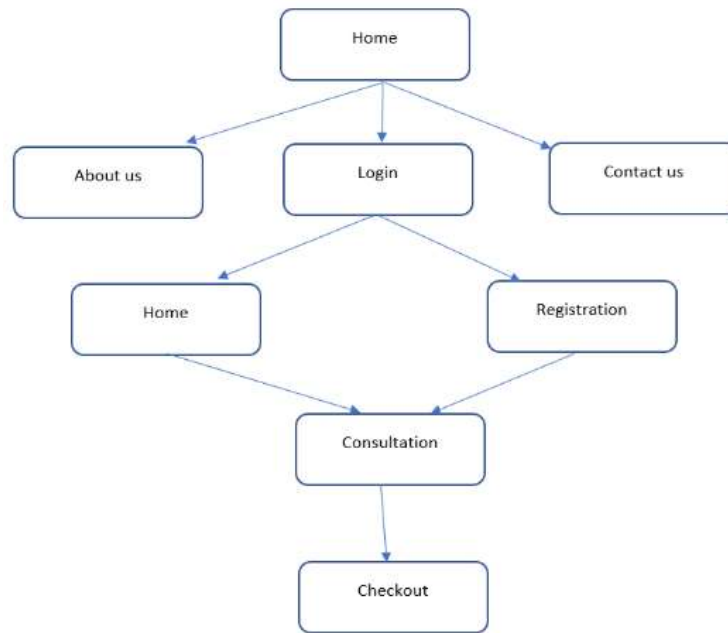

Figure1: System Design

Figure 1: System design

2.1 Working

- The user first visits the home page where they can see the facilities one can avail.
- If the user is facing any medical issues they can follow a set of steps to get to a proper guidance and supervision.
- The user can book an appointment with any doctor as suitable using the consultation page.
- We have a doctor and patient registration page wherein one can get the credentials to log into their personal track of medical history.
- Similarly, a doctor can also register themselves and get credentials to monitor the patient they are supervising .
- We have a contact us page wherein any user can connect with us and to get guidance and give feedback.
- We have an about us page where one can get to know us and our organization.

PHOENIX
Digital Healthcare Solution

Home About Us Contact Us

Helping Hands, Caring Hearts!
Welcome to Phoenix

It is a platform that enables patients and doctors meet virtually to make health consultations, monitor and leave feedback.
It is User Friendly Digital Healthcare Solution.
For you and your Loved Ones

WHY CHOOSE US

We Thrive on Building Healthy Community for every individual

We enable more patients get the personalized attention and expert care they need for their health.
Manage your healthcare experience with Phoenix

Book Appointment
Connect with Doctor
View all your medical records
Find Doctor

HOW PHOENIX WORKS

Hassle Free Appointments with prime Doctors

- Find experienced doctors across all specialties
- Explore available timeslot of your desired doctor's near you
- Book a physical or virtual appointment
- Get notified about appointments and meetings
- You are Done!

Book appointment

Our Doctors are Coming Online!!

Consult & monitor remotely from anywhere, anytime.
It could be your consultation with a certified doctor for examination.

Consult with Doctors
Neurologist, pediatrician, dermatologist, and many other specialists from the comfort of your home.

The image shows a web page for Phoenix Multi-specialty Hospital. The header includes the hospital's logo and name, and navigation links for Home, About us, and Contact us. The main section is titled "Contact Us" and features a large illustration of a laptop, a clipboard, a smartphone, and a mouse. Below this, there is a "Get in Touch" section with a form for Name, Email address, and Message, and a blue "SUBMIT" button. To the right of the form, there are three contact details: a location pin icon for the hospital's address (Botar(E), Branch-Virar(W) & Vasai(E)), a phone icon for office numbers (Botar Office: 9323299521, Virar Office: 9673551462, Vasai Office: 8421223788), and an envelope icon for email addresses (phoenixbotar@gmail.com, phoenixvirar@gmail.com, phoenixvasai@gmail.com).

3. CONCLUSION

This project has been a rewarding experience in more than one way. The entire project work has enlightened us in the following areas.

- a) We have gained an insight into the working of the HOSPITAL. This represents a typical realworld situation.
- b) Our understanding of database design has been strengthened this is because in order to generate the final reports of database designing has to be properly followed.
- c) Scheduling a project and adhering to that schedule creates a strong sense of time management
- .d) Sense of teamwork has developed and confidence of handling real life project has increased to a great extent.
- e) Initially, there were problem with the validation but with discussions, we were to implement validations
